The Sheraton Hotels & Resorts chain has announced that the flagship facility of this brand in Poland - the Sheraton Warsaw Hotel has been renovated. The renovation covered all hotel rooms. The design by the London architect Alex Kravetz combines the chic, contemporary design of rooms with tradition and a perfect location at Plac Trzech Krzyży.

The Sheraton Warsaw Hotel offers 350 spacious rooms and suites. The London designer Alex Kravetz has created a residential decor that will satisfy businessmen, high-ranking diplomats and leisure travelers alike. The hotel apartments offer a network of interconnected rooms where work can be combined with relaxation in a pleasant way. In each room you can find a window that opens. The Sheraton Signature Sleep Experience bedroom includes the famous bed made especially for the Sheraton brand, which eliminates the occurrence of any points of pressure, thus ensuring a good night's sleep after a long flight, intense physical exercises or sightseeing in Warsaw.

- I worked with this project with great pleasure. Renovation brings back the glow of the icon of the hotel industry, which combines tradition and a great location with elegant, contemporary room design - says **Alex Kravetz**.

The first renovated hotel floors have already been put into use by guests, and the entire renovation will be completed by the end of 2017.

- Renovation is a milestone for the Sheraton brand in Poland. Since the beginning, Warsaw's Sheraton has been a meeting place for celebrities, heads of state and business leaders, and also a favorite hotel for tourists, many times awarded for impeccable service. We are restoring the iconic glow to be the flagship of the Sheraton brand in Poland - says **Gonçalo Duarte Silva**, general director of the Sheraton Warsaw Hotel.

The hotel is located on the corner of Trzech Krzyży Square, by Ujazdowski Park, surrounded by lively restaurants, government institutions and elegant boutiques. It is a perfect place for guests who want to relax in an atmosphere conducive to establishing new contacts, relax in chic and comfortable interiors maintained in a modern style and enjoy unforgettable works of culinary art.

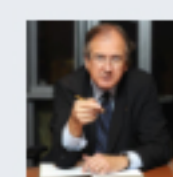

In the heart of the hotel there is a banquet space reserved for special events, stretching over two floors. The advantages of the conference space are additionally supplemented by the culinary offer and reliable service quality, which is famous throughout the capital.

Club rooms and suites also provide access to the renovated Sheraton Club Lounge: a private space where guests can enjoy free Wi-Fi, free breakfast, drinks and snacks during the day, as well as evening cocktails with a large selection of spirits and snacks.
